

Item code: iPETROLITE

The iPETRO Lite is a next generation, fully cloud based Fuel Management Solution. Based on a secure web based portal for simplified management of your refueling site, take control of your fluids management with the fully cloud based iPETRO Lite.

Gain insight and accuracy in your refueling. Track every litre of fuel dispensed with iPETRO Lite, allowing only authorised users with contactless NFC cards or PIN numbers to access your site

iPETRO Lite is a cost effective solution to track your fuel consumption, assisting in claiming fuel rebates and reconciling your fuel stock levels.

As a fully cloud based system, the iPETRO Lite removes the need for software installations. Access your data through the portal from any browser enabled device.

iPETRO Lite produces simple, easy to understand reports that simplify your fuel management. Control your tags from your web portal, using the simple and intuitive iPETRO Lite Cloud.

FEATURES:

- Secure contactless technology to track every litre.
- Automated transaction uploads via 3G technology ideal for unmanned sites.
- Choose the time at which your once-a-day transaction upload is carried out removing the need to visit the terminal.
- Standard and backup memory with capacity for 4000+ transactions.
- Up to 250 users with contactless vehicle or driver tags.
- Upgrade your terminal to use our new V-Tag system (Virtual tags) - no more need for physical tags just enter your pin to commence fuelling.
- Full QWERTY keyboard for easy odometer and data entry.
- Override switch available for manual fuelling.
- Centralised reporting, view multiple sites under one screen.
- Cost effective solution for small, medium or large fleets.
- Track fuel by vehicle or driver.
- 2 Pump upgrade available.
- Stock reconciliation.
- With RS232 or RS485 interface for tank gauging capability.
- USB or 3G/4G connection type.
